DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed 16 March 2004 amends claims 1, 5, 7-8, 10, 14. Applicant's amendment has been fully considered and is entered.

Response to Arguments

2. Applicant's arguments, filed 16 March 2004, with respect to the Alperovich reference have been fully considered and are persuasive. The previous claim rejections have been withdrawn.

Allowable Subject Matter

3. Claims 1-17 allowed.

The following is an examiner's statement of reasons for allowance: The claimed invention utilizes an encryption algorithm database containing a plurality of encryption algorithms that are utilized within a cellular communications system based on the location, specified by a region code, of a base transceiver within the system. The closest prior art, Alperovich, discloses a region code database that determines the ciphering mode allowed for the location specified by the region code. The ciphering modes are limited to restricting or allowing ciphering within that geographical or geopolitical area. Alperovich does not disclose or make obvious using a plurality of different encryption algorithms, which are stored in the database, based on the region code.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
